

Our desire to deliver to people, regions, and the future will create new value.

AEON MALL does not only provide tangible products and services.

We provide a place for customers to have a great time with their precious family and friends while discovering new interests and delights.

We also want the people working in the malls to have a pleasant and fulfilling professional environment.

Furthermore, we want people in the community to have a sense of security that AEON MALL is a safe place to be even in the event of a disaster.

And here, children who will lead the next generation can find the beauty of nature.

We strive to enrich not only the moments spent at AEON MALL but our daily lives and the bright future as well.

Our management philosophy, "Life Design Developer", embodies the desire of each and every one of us.

This report introduces our specific corporate activities and our desire that drives such activities, with a focus on the issue (materiality) that AEON MALL is specifically addressing to become a true life design developer.
