

Management Philosophy

AEON MALL is a Life Design Developer that works with communities and produces ways of living for the future.

“Heartwarming Sustainable” is our initiatives to contribute to and revitalize the local community toward the realization of a sustainable society as a corporate citizen with the management philosophy of Life Design Developer. We are striving to create a better society with customers, local communities, partner companies, shareholders and investors.

Initiatives for material issues (materiality)

We are working to improve and solve the 10 items we to our company and stakeholders, and closely related

selected from among various social issues as management issues, which are particularly important to our daily business activities.

| | Connection with local communities | Regional and social infrastructure development | Environment | Diversity and decent work | Responsible business promotion |
|--------------------------------------|---|--|--|--|---|
| SUSTAINABLE DEVELOPMENT GOALS | | | | | |
| Our desire | We respect local cultures and contribute to their development and succession. In addition, we aim to solve social issues that will arise as we face the problem of a declining birthrate and an aging population. | We make local residents' lives convenient as an infrastructure base and provide safety and security by creating disaster-resistant facilities. | We solve global environmental problems such as climate change and promote town development that is rooted in the community and in harmony with nature. | We are committed to creating a comfortable work environment for a diverse workforce, including staff of specialty stores and our employees, regardless of nationality or gender. | We endorse the realization of a society in various countries and regions where human rights are respected. In addition, we have an audit system in place to strictly handle internal fraudulent acts such as bribery. |
| 10 material issues we address | Cultural preservation and inheritance Low birth rates, aging society | Develop sustainable and resilient infrastructure Responsible consumption and production | Climate change, global warming Protecting biodiversity, resources | Healthy lives and well-being Diversity and inclusion, decent work | Human rights Bribery |
