Human Rights Policies, Systems, and Training

The unwavering principle of Aeon is pursuing peace, respecting humanity, and contributing to local communities, always from the customer's point of view. To honor these principles we will comply with all relevant laws and regulations, while dealing with all people honestly and sincerely through proper behavior. The AEON Code of Conduct was enacted in April 2003 on the basis of these values. In September 2014, AEON codified a philosophy of human rights and the workplace producing AEON's Basic Human Rights Policy in support of the AEON Code of Conduct.

AEON MALL follows this philosophy and these policies

in respect for human rights. The company aspires to create an organization that allows all people, regardless of their gender or nationality, to participate in the development of the company. We strive to create workplaces that enable all employees to perform to the highest level of their abilities.

All AEON MALL employees must attend an annual human rights training. We also provide employees with a handbook that lists both internal and external help desks. This handbook provides clear information about respect for human rights, prevention of discrimination, and other matters in the context of the AEON MALL employment rules.

Formulation of Guidelines for Sustainable Transactions

Overview

To prevent situations with potential human rights violations and build a sustainable value chain, AEON MALL established our own Guidelines on Sustainable Transactions ("Guidelines"), based on the AEON Human Rights Policy and AEON Supplier Transaction Code of Conduct. Our Guidelines ensure a comprehensive inclusion of international norms and industry human rights matters related to human rights and labor. At the same time, these guidelines identify matters that should be included in our own guidelines based on an assessment of importance. We contribute to sustainable societies by sharing our values with our business partners and using these values as a guide to fulfill our social responsibilities.

See the AEON MALL corporate website for more about our Guidelines.

Formulation Process

We worked with external experts and engaged in the following process to formulate our Guidelines.

1. Confirm human rights matters based on international norms, etc.

We referenced the International Bill of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and other international norms on human rights and labor when considering the elements to include in our Guidelines.

2. Confirm human rights matters in our industry In addition to international norms, we confirmed the matters related to human rights and labor that are emphasized in our industry when considering the elements to include in our Guidelines.

3. Assess importance

We assessed the importance of human rights elements identified in steps 1 and 2, defining important matters to reflect in our own guidelines, including child labor, forced labor, working hours, discrimination, and health and safety.

4. Prepare guidelines and requirements for each human rights matter

We prepared guidelines and detailed requirements for each matter.

Future Implementation

In the future, we intend to share our guidelines with group companies and business partners, asking them to comply with these guidelines. We will also strive to understand the status of implementation, aiming to manage and reduce human rights risks in our supply chain.

Implementation of Human Rights Due Diligence

At AEON, all AEON People (executives and employees) gain a deeper understanding of human rights, and, based on the AEON Human Rights Policy, strive to create a society that respects human rights. The AEON Human Rights Policy* clearly describes a human rights due diligence process. In accordance with the AEON guidelines, AEON MALL began implementing this initiative in 2020. As described in the United Nations Guiding Principles on Business and Human Rights, we will continue our efforts to build a sustainable value chain in our role as a leader in ensuring human rights.

2020-2021: Human Rights Due Diligence Implementation Process

Identify actual conditions and conduct gap analysis We took inventory of our existing human rights-related activities in Japan and overseas, striving to understand the actual situation. Next, we conducted a gap analysis comparing external demands and our actual situation with respect to policy disclosures on child labor, forced labor, and other human rights risks, as well as systems and operational structures, including access to emergency relief. Based on the results of our gap analysis, we confirmed the key points for further disclosure and initiatives in the future.

Identify human rights issues

We then referenced international norms and guidelines, including the International Bill of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work. In addition, we identified industry-specific issues and identified human rights risks from a larger number of issues related to our company and value chain. These risks included the prohibition of discrimination, equality before the law, and procurement practices.

Conduct risk assessment and identify impact

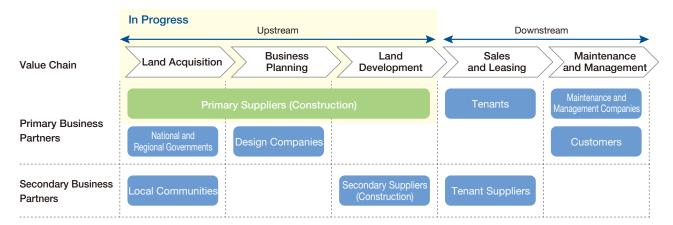

Based on the Guiding Principles on Business and Human Rights, we plan to assess the risks of the human rights issues identified in terms of severity and likelihood of occurrence. To reflect our real-world situation more accurately, we will conduct interviews and a written survey on the status of human rights initiatives, including the status at overseas group companies. During the process of risk assessment, we will identify the negative impacts of human rights issues.

Consider mitigation measures

We will identify matters of particularly high impact as priority issues, considering mitigation measures that include responses, preventive and corrective measures, and operating systems.

Implementation planned

During the current fiscal year, we are conducting human rights due diligence, mainly focusing on the upstream portion of our value chain. In the future, we intend to expand the scope of implementation to include downstream contractors and tenants. Here, we plan to confirm the status of compliance with our Guidelines for Sustainable Transactions throughout the value chain, as well as examine measures to address and mitigate negative impacts.

Human Rights Due Diligence Post-Implementation Roadmap

After implementing the human rights due diligence process fully, we will establish a PDCA cycle for corrective action plans. In this way, we will secure a structure for engaging in human rights risk reduction on a regular basis and disclose identified risks in our integrated report cover the next fiscal year.
