

Every action of every person, for a sustainable future.

We at AEON MALL move forward, step by step, toward the creation of sustainable societies.

Safe and secure facilities at all times.
Supporting healthy and active lifestyles.
Communicating the traditions and culture unique to each area.
Living in harmony with nature in an environmentally friendly way.

Every person at AEON MALL is a Life Design Developer. We do everything we can for our communities and take on the challenge of new initiatives.

And we will continue to strive for a sustainable future by working together with all people involved in AEON MALL, including members of the local community and employees of specialty store tenants.
